

TRAILMARK

National Parks Artwork Task - Samo

Purpose: collect a consistent set of illustration assets that can be used to finish the TrailMark national parks website.

Main goal

Use Freepik to find strong, visually consistent drawings/illustrations for each U.S. national park. We need artwork that feels like one family across the entire website - outdoors, adventurous, clean, timeless, and suitable for a modern national-parks guide.

For every park, collect these 3 asset types:

1. **HEADER / HERO DRAWING** - wide landscape illustration showing the park's most recognizable scenery or identity.
2. **BADGE / EMBLEM ART** - simple compact illustration that can work inside a TrailMark park badge, stamp, patch, or circular emblem.
3. **EXTRA ILLUSTRATION** - one additional visual representing something distinctive: wildlife, geology, plants, landmark, trail, water feature, cultural element, etc.

Important visual rules

- Prefer illustration/vector artwork over generic stock photography.
- Keep the style as consistent as possible from park to park.
- Avoid artwork with visible text, logos, watermarks, fake National Park Service branding, or copyrighted character imagery.
- Hero art should have enough open space for website text and work well in a wide crop.
- Badge art should stay readable when reduced to a small size.
- Choose imagery that is genuinely identifiable with that park rather than generic mountains/trees whenever possible.
- Save the Freepik source link for every selected asset so licensing/source information is not lost.
- Do not permanently alter or finalize the TrailMark logo/badge design - these are source illustrations for the website team to integrate.

Suggested folder structure

One folder per park. Inside: **01-header**, **02-badge**, **03-extra**, plus a small text file containing the Freepik URLs/source information.

File preference

SVG or editable vector when available; otherwise the highest-quality PNG/JPG available. Keep the original downloaded file. Do not compress it.

63 National Parks - Artwork Checklist

For each park: Header / Badge / Extra / Source link.

What to Look For

Header / hero examples

Look for the defining landscape: Yosemite granite, Zion canyon walls, Everglades wetlands, Yellowstone geothermal features, Arches sandstone arches, Badlands formations, Acadia coast, etc. The goal is for a visitor to immediately feel the identity of the park.

Badge examples

Choose one strong symbol: a landmark silhouette, animal, plant, geological formation, volcano, arch, mountain, cactus, cave, lake, tree, or other park-specific icon. Simpler is better.

Extra illustration examples

Use this to add storytelling: bison, alligator, bear, elk, Joshua tree, saguaro cactus, redwood, geyser, waterfall, lighthouse, cave formations, dunes, coral, glacier, river, canoe, trail feature, or another distinctive element.

Before marking a park complete

Confirm all three assets visually work together, the source link is saved, the artwork is high resolution/editable where possible, and the selected imagery actually represents that park.

Deliverable to Yegor

A clearly organized folder containing the selected artwork for all parks, with source links. These assets will then be handed off for integration into the TrailMark website and final UI work.
